

A small dataset, a clear decision.

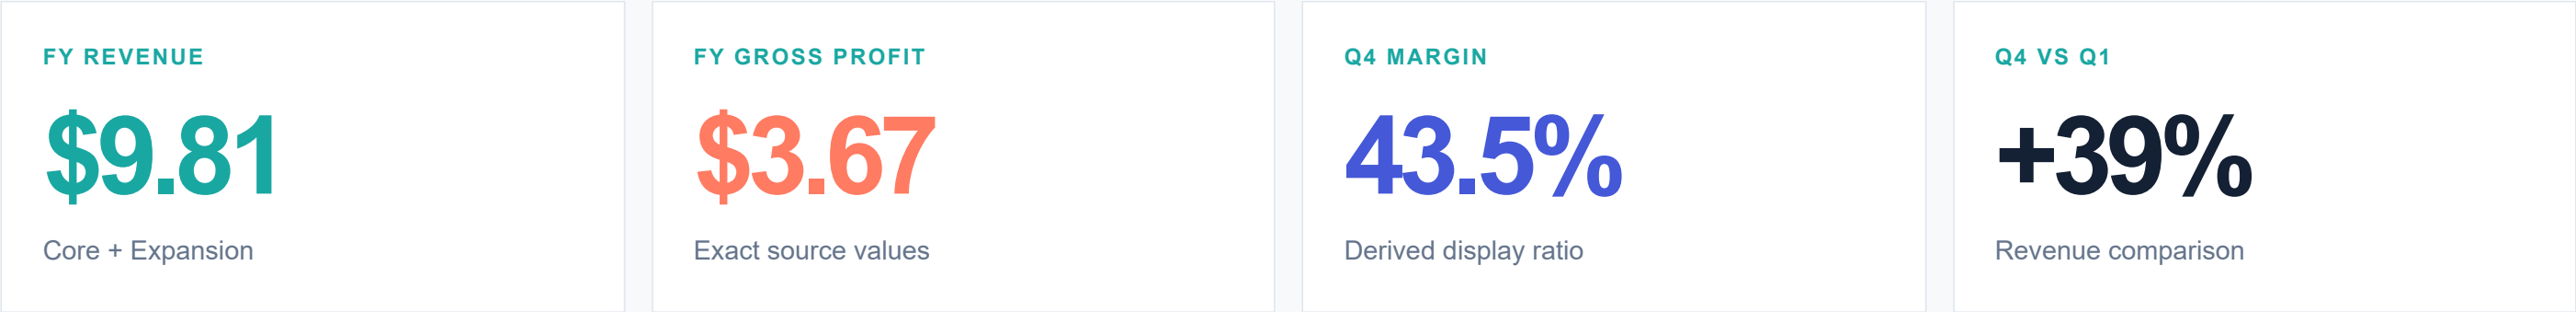

An illustrative quarterly review showing how structured values can remain visible, ordered, and editable across a real presentation output.

SOURCE CONTRACT

financial-data.csv

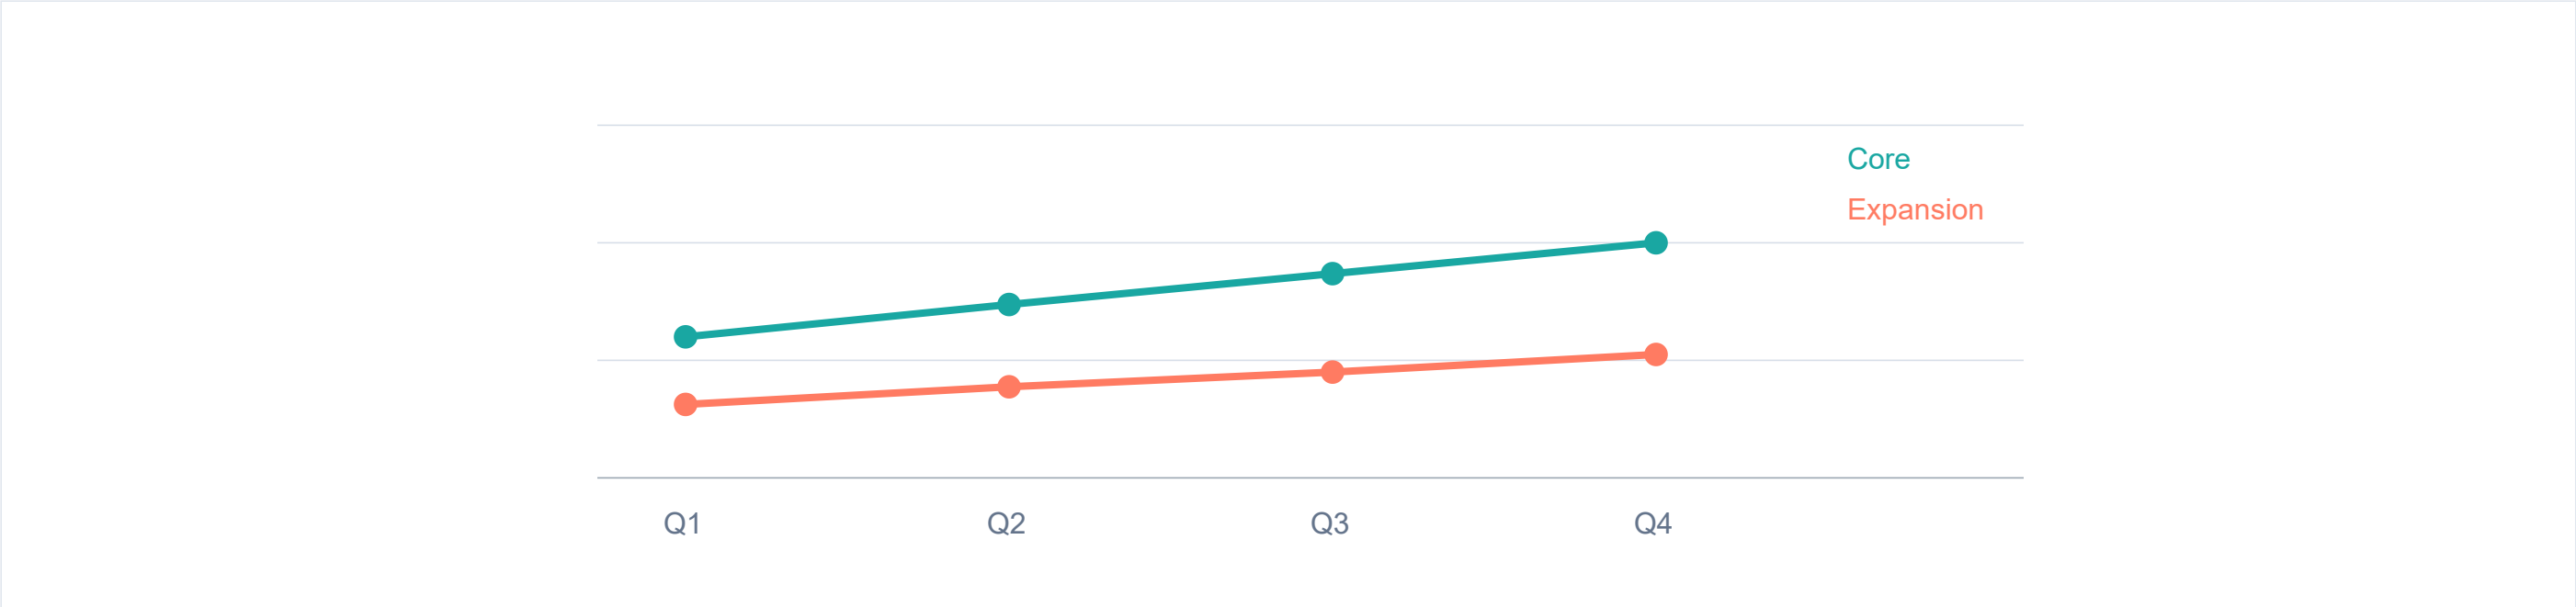

Currency: USD millions · values are illustrative

Growth is broad-based, with expansion carrying the margin story.

All raw revenue and gross-profit values are bound from the accompanying CSV; displayed ratios are labeled derivations.

Revenue climbs each quarter in both segments.

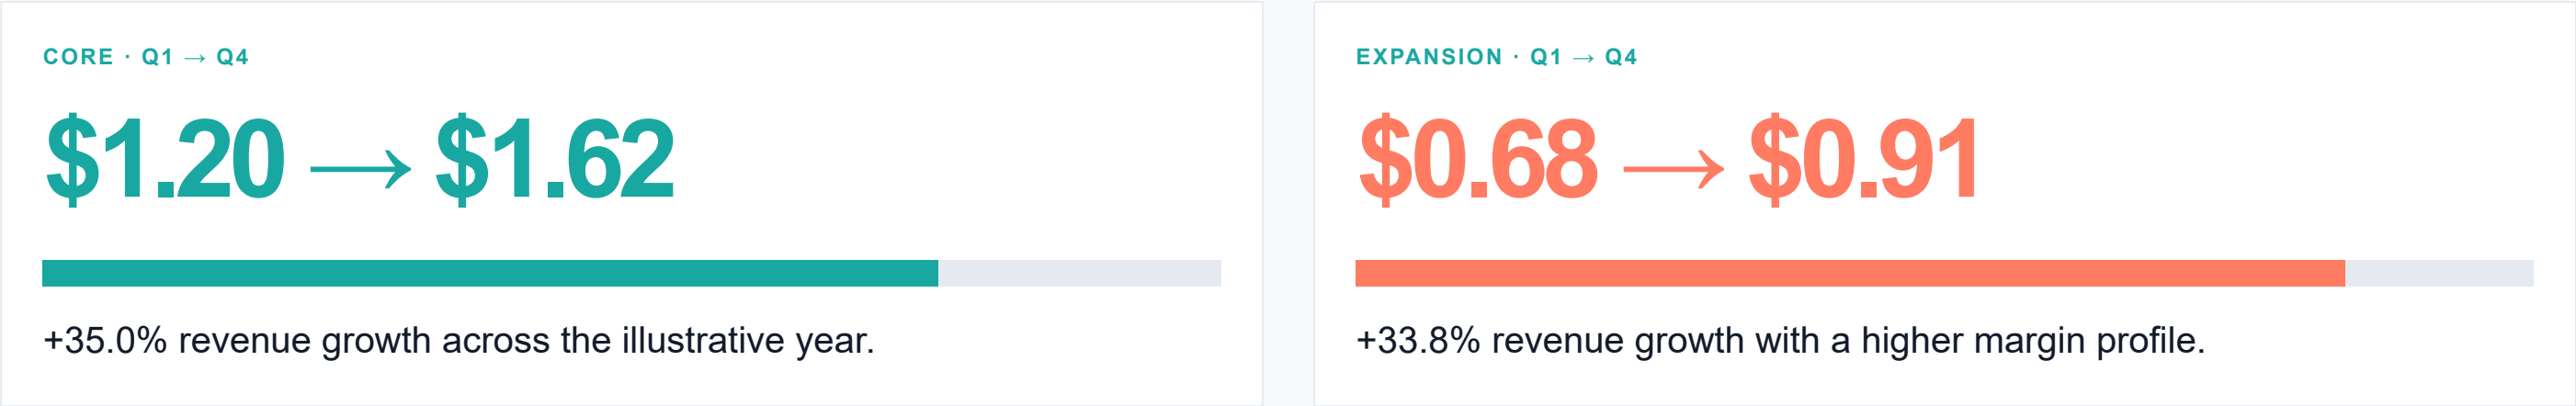

USD millions · native PPTX chart carries the same 8 source values.

Order and units stay visible in the source-to-slide handoff.

SEGMENT	QUARTER	REVENUE	GROSS PROFIT	MARGIN
Core	Q1	\$1.20M	\$0.42M	35.0%
Core	Q2	\$1.34M	\$0.51M	38.1%
Core	Q3	\$1.47M	\$0.58M	39.5%
Core	Q4	\$1.62M	\$0.66M	40.7%
Expansion	Q1	\$0.68M	\$0.31M	45.6%
Expansion	Q2	\$0.76M	\$0.35M	46.1%
Expansion	Q3	\$0.83M	\$0.40M	48.2%
Expansion	Q4	\$0.91M	\$0.44M	48.4%

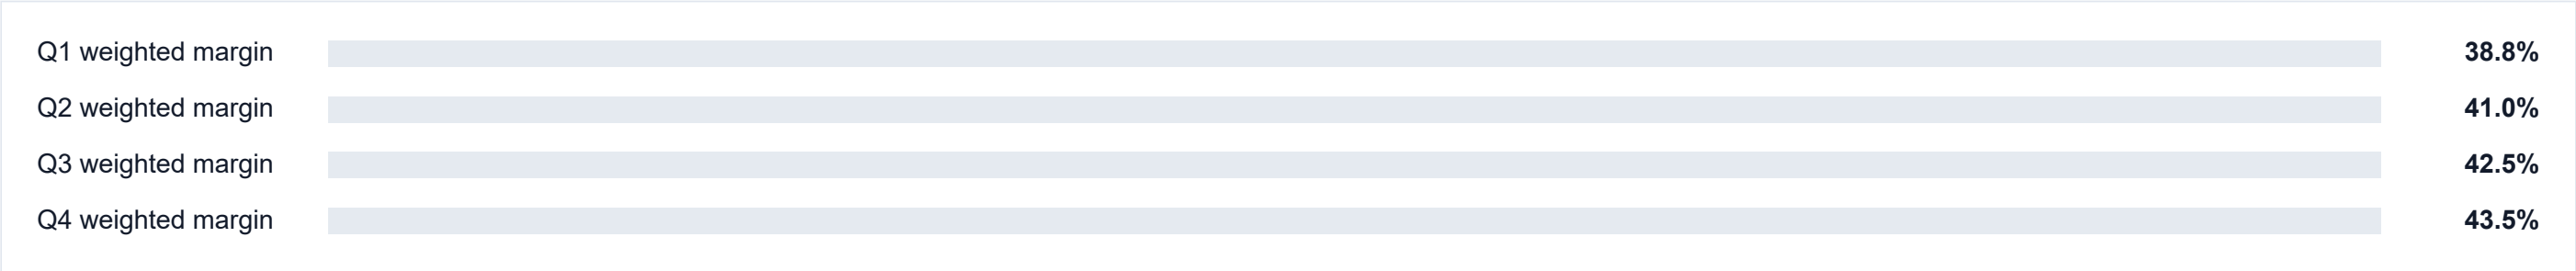

Exact rows shown in source order; no hidden aggregation.

Expansion grows faster; Core remains the scale anchor.

Comparisons are computed from exact CSV endpoints and shown as labeled derived metrics.

The margin mix improves as Expansion earns more share.

READOUT

The source table remains the authority; the chart is the decision surface.

A faithful deck makes the data rules inspectable.

TYPES

Decimal stays decimal.

Revenue and profit retain two decimal places in the visible source table.

ORDER

Quarter order is stable.

Q1 → Q2 → Q3 → Q4 is preserved in CSV, chart, and table.

UNITS

USD millions is explicit.

No silent currency conversion or rounding step.

Native chart + native table + exact-data manifest = a verifiable presentation artifact.

Three actions follow from the illustrative review.

01 **Protect Core conversion.**

It carries the largest absolute revenue base.

02 **Keep funding Expansion efficiency.**

Its margin profile supports focused growth.

03 **Reuse the data contract.**

Next quarter should update the source, not redraw the deck by hand.

The story changes when the data can still be edited.

This deck is intentionally small: a public dataset, a native chart, a native table, and a visible contract between them.
